

Hologram of heaven in acasic recode.
Zen of mind realize with non thought skill. Noise non zen and
thought of being freezed from.

Masaaki Yamaguchi

In acasic record destruct with everyone cutting from port of master, this decieved with mechanism explain from being how to access with this despline with screen of zen from non imagine with mind. And this mechanize with non sence of mind and non loose of slentivity, this point of mathmatics of acasic record architect with thousand of mathmatician discover with point of point from everywhere to one heaven of being estimate with secret data of quantum imformations. From of zen to non sence of existed mind emerge with being frozen thinks, Freeze of mind in non pulse with being seen with other minds, and other future of secret data.

This similarity of acasic record are accessed with study of mathmatics with being existed of tuplespace in hologram space, this spaces are linked to sentivilize with tuple of every persons of mind and themselves being haven with one'data. Then, this acasic record len with every mind in hologram of tuplespace.

Other persons are read from frozen of cold mind, and key of pulse of spiritual mind with low levels, this cold body and low pulse are keys from possibility of beign read to other mind, however, acasic record are ability of facility with zen of this moreover level, Zen in frozen thought read to emerge with mathmatics data of equation and phenomonone defuse with spiritual mind and this data from them skills to sense with quantum data in themselves of facility.

Reverse of this skills are able to create with mathmatics of acasic recode. After all, non thought equal with refuse of thought and emerge with being accessed to acasic recode of equations.

However, this skill of other persons and future of data are non equal with acasic recode of routs that non pass throw to these areas. This skill of reading of other person mind is straight to see with cold power of line into future routs. Non relativity of acasic record, however, Kazuyo Katuma always read and see to remind her selve to experient from every day of morning to this day what to happen of events and meet with how person appear with her. This her explains inspect with video of mind read from photo reading skills. Moreover, her inspirator with higher self of acasic record, and this read of data that established of her books with cover designed. This cover designed of her books appear with ideas from radon of lake.
