

# Dimensions from D-brane is global cut manifold assemble with being group theory

Masaaki Yamguchi

In this report mention to universe and quantum theory in general relativity theory extline with zeta function, and this system Wel's theory and Serbarg zeta function remaine all of function to glade to see from, moreover methaniam series mention to qunatum and general theory with zeta function strein to L-function, and also this system construct with L-toll of pole and square, moreover, estern space theory involved with category thoery.

D-brane esessemble with global cut manifold of claster of funderment group from zeta function renewed on project space from being mirror of D-brane theory near of M theory.

Universe and other dimension stimulate from being uncline system garderstien with exclude and include be closterate of metamole add of group on being from Dimension to Dimension flow with uncline escalate in be overstand afrain equations.

$$t \int \int \int [\square^m]_{D(x)} \ll_p d\square_m$$

This function is D-brane of global cut manifold, and estemant of any other dimension construct from zeta function chain with zoom global dimension. D-brane stern from open and pin with D boll and square mechanise to be baggelate from qunatum effective reserned.

$$= [D^m \psi \wedge L(s)] / \square_m$$

$$= \oint [\mathcal{L}(s)] dx_m$$

L-function is assemble with volume manifold. L-function also zeta all of function construct from Courchy function.

$$= \int \left[ \frac{e^x}{x!} \right] d\text{vol}$$

This function mension to Courchy function is returned from zeta function.

$$= \int \frac{\pi(\chi)}{2\pi i} d\chi$$

After all, F function remaind with projection system, and underline damage with restruct from claster of mild with being uncliouded surface dimension.

$$= \mathcal{F}(s) = [\mathcal{F}(s)^{\{(m)\}}]_{D(\chi) \ll_p}$$

Global topology of zone sterlain with F cut function on small of system be function restaine assemble of add Dimension. This Dimension melolize with fourth dimension of D-brane. This D-brane mental with all of function be toll from topology system.
